

***Incredible, but true!***

All the information in an enormous Encyclopedia now comes on one small disk. Which do you prefer- the CD-ROM or the book? Let's compare them.

The CD-ROM is smaller and lighter than the books and it's cheaper. We think it's more interesting, too, because it has video and sound- you can hear animals, musical instruments, and famous people talking. So, if you think the 30 books are good, we think the CD-ROM is better!
